GTA 6: A Timeline of Mayhem

In December. 4, 2023 Rockstar games released a new trailer for the much anticipated Grand Theft Auto 6, the game is set in Vice City, Florida as we can see from the tropical environment and alligators, GTA fans are very excited for this upcoming game and are very pleased with the ‘Mayhem’ that the game brings. An example of this ‘Mayhem’ is the picture on the right shows the driving to be very chaotic shown by the girl almost flying out the car. I’m certain that players are going to have plenty of fun with these new

driving mechanics and the new unique wildlife compared to the other GTA games. Florida has a variety of interesting animals like many fish and alligators which can bring many fun fishing mechanics, and alligators which will lead the players to be aware in the swamps below the murky water, it may be unfortunate but alligators are very sought after for their hide and players would be able to

gather and sell alligator hide for money and possibly in game quests. The much anticipated game will come out in 2025, though it is unclear which month, many hope for an early release day.

One thing we can be certain of is that this game will reek true mayhem.
